Are you bringing your laptop?

If you want to bring your laptop, you can download the software by following [this link](). Also, don't forget to come with your battery completely charged and bring your charger. **Follow these instructions for downloading the software:**

1. If your company or school owns Bentley software, you or your IT people can install the software you will be needing for your sessions at the Bash on your laptop. If your company doesn't own that particular software, you can use the temporary license activation key listed on the software page. This will override your company's license key until you put it back or the temporary one dies on **September 30th**.
2. If you don't own any Bentley software, please use the temporary license activation key listed on the Software page when asked for it after installing the software. This key is only good through **September 30th**.
3. If you are a student or faculty at a school with an academic subscription, download the software you want to learn from www.bentley.com/studentserver, and use the activation code found on the download site. If you do not know your school code or if your school has a subscription, please email shannon@archwaysystems.com and I will get you that information along with detailed instructions for download as a student.
